

# PET CARE APPLICATION

## About Application:

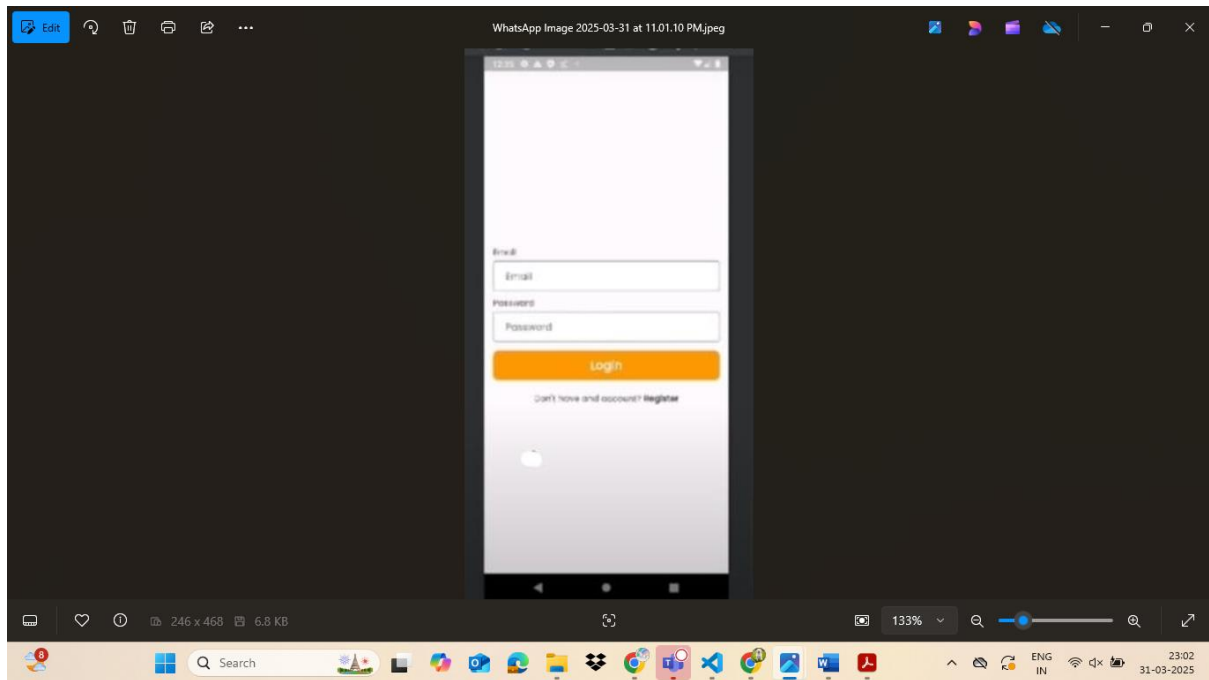

The PetCare application is designed to help pet owners manage and care for their pets efficiently. It offers various features like creating pet posts, viewing pet details, making requests, and managing profiles.

## Concepts applied in application:

1. Widgets
2. Stateless and stateful widgets
3. Styling and Theming
4. Layouts and Views
5. Navigations
6. Gestures
7. Api Calling
8. Database
9. Firebase integration
10. Localization

# Home Screen

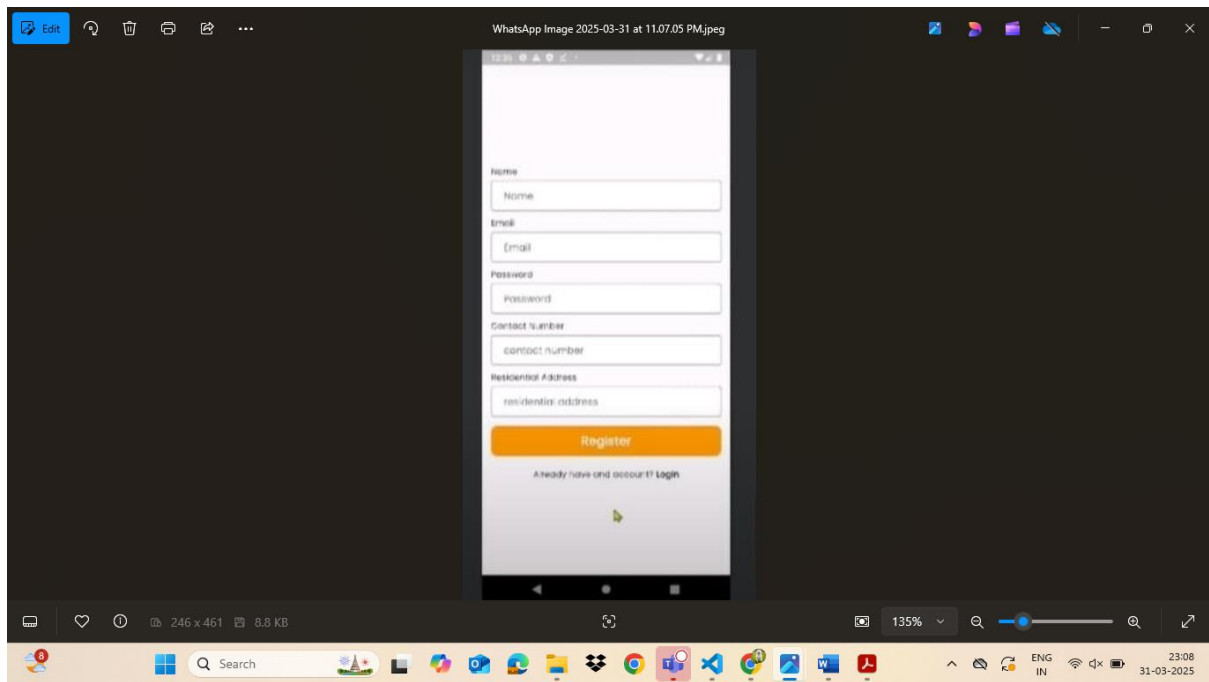

## LOGIN

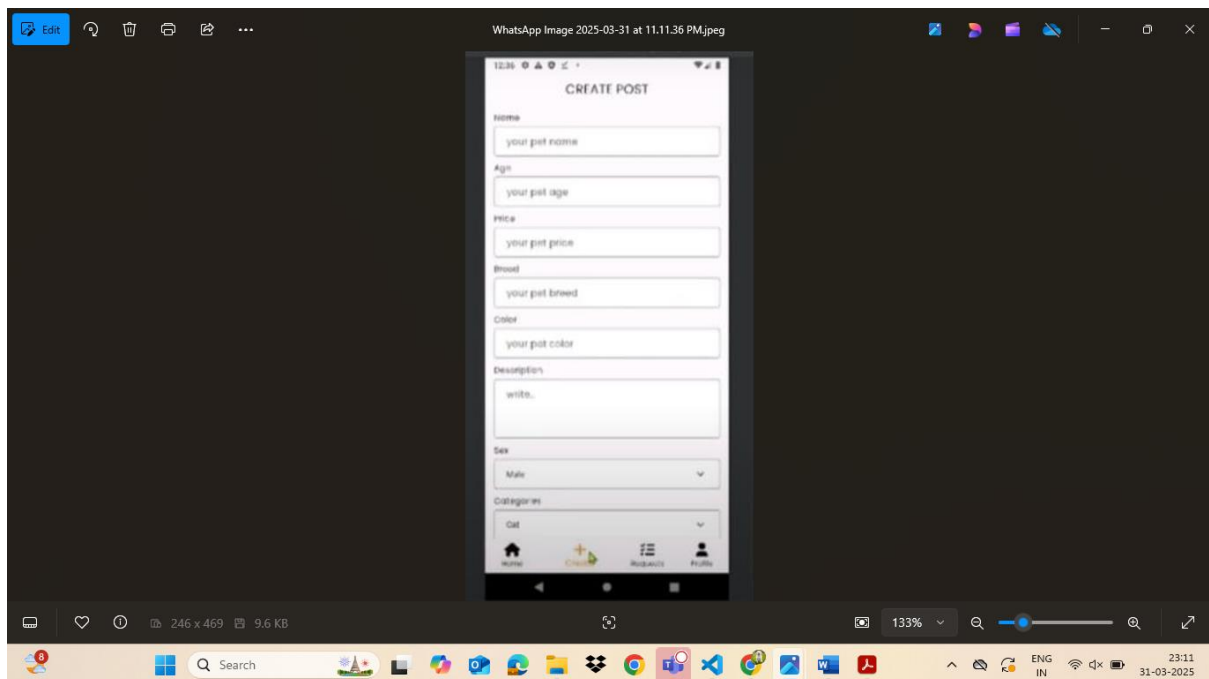

The Home Screen serves as the main interface where users can explore pet-related posts and services. To access personalized features, users must first log in via the Auth Screen, which handles authentication. Once logged in, users can create posts, view pet details, and manage their profiles seamlessly.

## REGISTRATION

The Home Screen Registration in PetMobileApp allows users to sign up and access pet care services seamlessly. It features an intuitive UI for entering user details, authentication, and profile setup. Firebase integration ensures secure data storage and user verification.

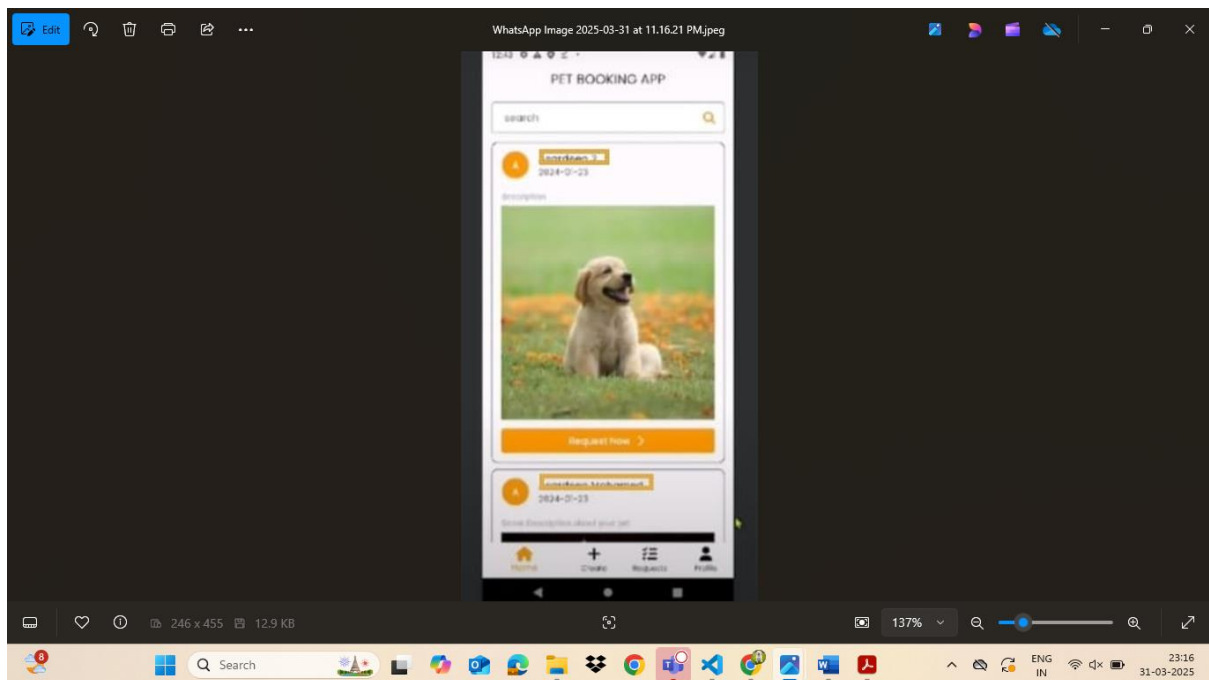

## Create Pet Post

The Create Pet Post screen allows users to create and share posts about pets, including details like name, breed, and images. It provides an intuitive interface for adding pet-related information and

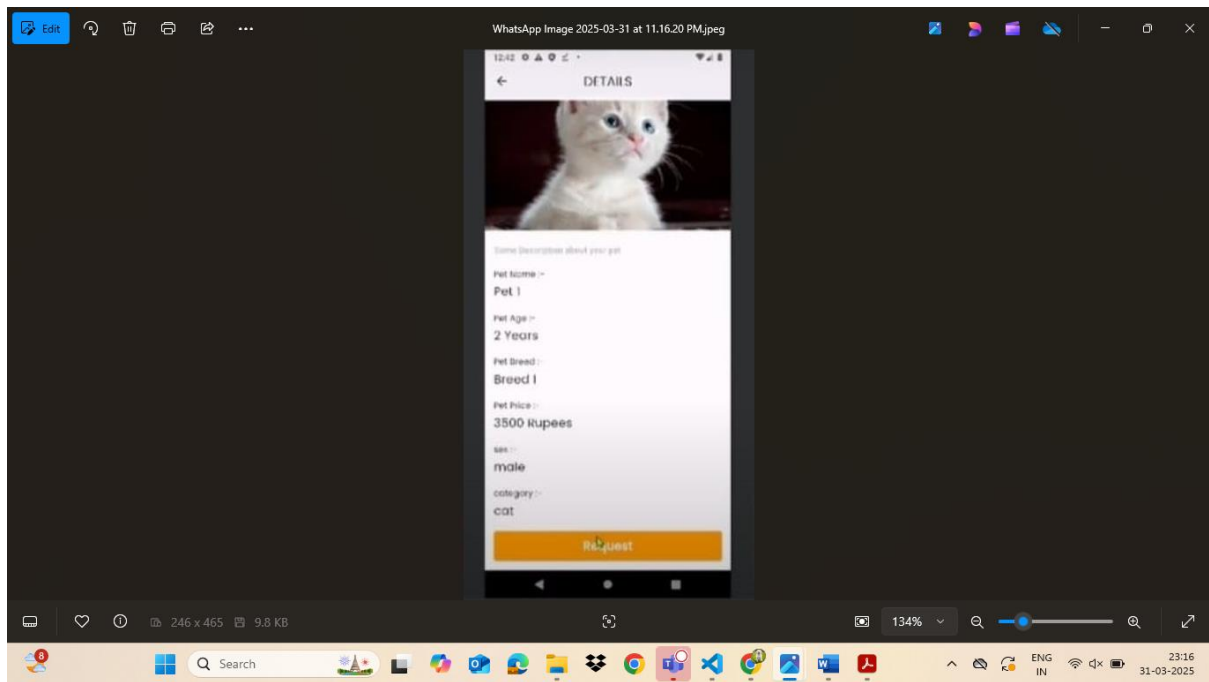

submitting posts. This feature helps in pet adoption, lost-and-found cases, or general pet updates within the community.

## Detail Screen

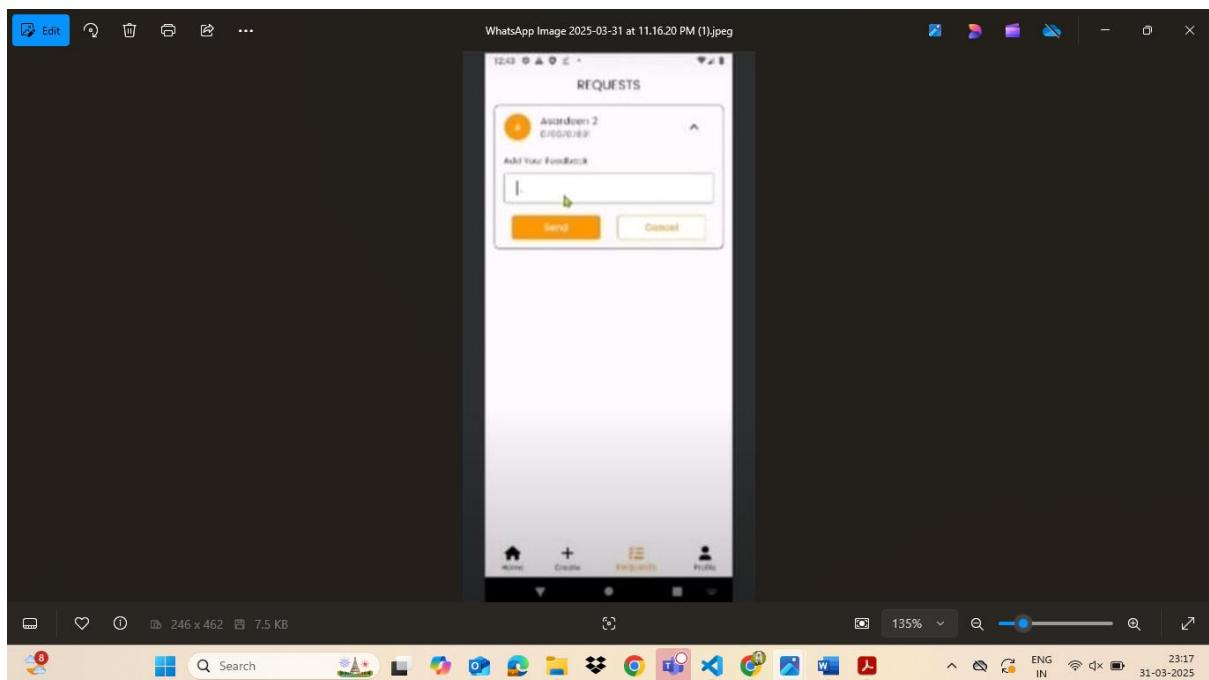

The above screen helps us to view the pets and also can search the pets.

The detail screen displays detailed information about a specific pet or pet-related post. It provides users with comprehensive details, including images, descriptions, and options to interact or take action. This screen enhances user engagement by allowing them to view pet profiles, adoption details, or service requests.

## Request Screen

The Request Screen allows users to view the pet name, pet age, pet breed, price, category etc. This screen ensures seamless communication between pet owners, service providers, and adopters.
